CHEMSOLUTE® Alkaline liquid cleaner

Parameter	Value
Appearance	Colorless to slightly yellowish liquid
Density	≈ 1.20 g/ml
pH (5 % in Water)	≈ 11.5
Foam volume (5 % in water)	min. 70 ml
contains Sodium hydroxide	

- Universal cleaner for removing heavy soiling.
- Suitable for wiping tables, tiles, floors.
- Can also be used to soak laboratory utensils before cleaning them in an automatic dishwasher.
- Not intended for use on alkali-sensitive materials such as aluminium.
- Tap water is used to prepare the cleaning solution. If there is a slight precipitation of the hardness constituents, additional quantities must be added. Demineralized water increases the cleaning effect.
- The washing goods were placed in the solution.
- After the cleaning is finished, the articles were rinsed first with tap water and then with demineralized water.
- The baths can be used for a longer period of time without any noticeable drop in the cleaning effect.
- If necessary, the rinsing solution can be supplemented with fresh detergent.
- The application time is less than 2 hours.
- In problem cases (e.g. plaster, blood or heavy oil), simply leave the rinsing solution in the bath a little longer.
