

## LABSOLUTE® GAS LIGHTER, PIEZO IGNITION

The white LABSOLUTE® gas lighter with aluminium shaft is characterized by a simple and safe handling. It can be used not only to light gas burners in laboratories. The lighter wins over a adjustable flame with piezo ignition, a safety lock and a viewing window to see the gas filling level easily. Due to the integrated eyelet the LABSOLUTE® lighter can be stored fast and is within reach all the time. The lighter comes already filled including protection cap.

### Your advantages:

- ✓ Adjustable flame
- ✓ Safety lock to avoid undesired ignition
- ✓ Protection cap to avoid dirt in the ignition device
- ✓ Already filled to be ready for use at once

**Please read the safety instructions and user manual carefully before using the gas lighter. Please ask your responsible Th. Geyer sales representative for further information.**
